(offers for traveling opportunities are welcome)

**Why** to walk such a distance?

- Martin Vosseler **likes to walk**. It's **good for him and for the planet**. This walk is a simple way to show how a personal choice can have many ramifications.

**Who** does Martin want to meet on his walk?

- Martin wants to get in touch with as many people as possible, including all the people along the way, Native American peoples, school children and students, politicians, and the media.
- Martin realizes the solutions to the earth's problems or cures for medical problems are no longer solely the responsibility of medical doctors, scientists, government officials, corporations. Martin's walk is a metaphor for each person taking responsibility for recognizing how they can participate in healing and repairing their bodies and the earth.

**What topics will Martin want to discuss?**

- Your questions and concerns regarding his interests and projects including solar energy and [www.sun21.org](http://www.sun21.org)
- The importance of energy conversion (renewable energies and energy efficiency instead of oil, gas, coal and uranium)
- The possibility of energy conversion for sound ecological and economic policy
- Priorities in world and national health.
- Innovative potential in the USA.

**Equipment:** Rucksack of 45 lbs., carrying device ([www.carrix.ch](http://www.carrix.ch)), tent, MBT-sandals ([www.mbt-shop-basel.ch](http://www.mbt-shop-basel.ch))
